

Bercomac Log Loader and Trailer

**Tough,
sturdy
and
smooth**

From time to time, we here at ATV World come across products specifically designed for ATVs that are useful for nearly all ATV owners. We understand how interested so many of you are in these new and innovative products like the Bercomac Log Loader and Trailer so we wanted to tell you a little about this one.

LIGHTWEIGHT

This new, innovative concept was originally designed with ATVs in mind. It's lightweight, yet surprisingly sturdy. Its all aluminum built structure, along with its compact and space saving components (motor, pump, gas tank) makes it easy to tow behind an ATV and equally easy to maneuver. The mini powerplant in this baby is a 6 horsepower Kohler gas engine that comes with a 2 year warranty right from Kohler.

THE BOOM

The boom or arm, will rotate 280 degrees and has a reach of 9 feet, 3 inches. The rotation is aided by a rack-and-pinion system and a hydraulic motor. The large grapple (hand if you will) offers an opening that measures 30 inches. With its unlimited rotation, it can lift logs up to 800 lbs. Another feature we liked was that all principal wear points are mounted on special replaceable bushings.

THE TRAILER

The tandem style axles on the trailer can move back and forth hydraulically. This helps balance the load thus making for safe operation. The tires are 26x12x12, so they won't keep you from getting into the back forty. The side bunks are mounted on pivot points to avoid damage when they're folded down and can hold two rows of logs measuring 48" long. In the event you want to use a hydraulic winch (not included), Bercomac has added an extra oil outlet to handle this.

THE CONTROLS

There are two main hydraulic controls, operated with a joystick. These are equipped with special spools that assure a smooth operation and makes for better accuracy when loading. When you're moving 800 pound logs around, you sure don't want to miss dropping these logs in the right place! These controls are located on a panel which also rotates, enabling operation from the left or right of the trailer. □

SPECS

Width: 58"
Length: 147"
Lift capacity: Up to 800 lbs at 8 ft.
Boom rotation: 280°
Boom reach: 9 ft. 3 in.
Grapple opening: 30 in. - unlimited rotation
Motor: Kohler 6HP
Pumps: Hydraulic
Gas tank: 2.5 gal
Side bunks: Removable
Weight: 800 lbs approx.
Warranty: Residential: 1 year
