Snow Won't Stick, Costs Won't Kill You

The Boss takes the performance of its

revolutionary "Steel" Power-V XT Snowplow to a new level with the introduction of the new "Poly" Power-V XT Snowplow. Available in two models (the 8'2" XT and the 9'2" XT), the Poly Power-V XT features a super-slick poly surface that lets snow easily slide off the blade, saving on fuel costs and minimizing wear and tear on the vehicle drivetrain. Designed for the toughest jobs, the Poly Power-V XT is a multi-position plow with a 37" flared blade wing that improves snow discharge for maximum performance. Both models come with a long list of standard features including:

- 1/2" x 6" high-performance cutting edges
- Synchronized blade movement with full blade trip design
- SmartHitch 2 Attachment System
- SmartTouch 2 Handheld Control
- SmartLight 2 Package
- Enclosed high-performance hydraulic package

SnowEx SP-75 Walk-Behind Spreader

The SnowEx SP-75 walk-behind spreader features an exclusive single-slot port design, making the unit capable of freely spreading large bulk materials and bag salt. With a hopper capacity of 1.8 cubic feet (roughly 100 pounds), the unit is ideal for sidewalks, driveways and other tight applications. Furthermore, the SP-75 includes a stainless-steel deflector, which encases the spinner and ensures that the spread material is delivered in a controlled, predictable pattern.
